

What Can You do?

- Understand what your company is doing to measure process safety performance. Learn and understand the specific measures that your company is using.
- Know what kinds of incidents need to be reported under your company's process safety measurement program.
- Be familiar with how to report process safety incidents in your plant.
- Be diligent in reporting incidents. Remember that a company cannot improve process safety performance if it does not know about incidents that occur in the plant.
- Understand leading indicators of process safety performance for your plant and how to report them.
- Download and read the CCPS report on measuring process safety performance
